

Prevent spread of Contaminants

The *Cleanmaster* HEPA Air Purifier is ideal for use as a Patient Isolator, helping to prevent the spread of airborne contaminants.

Contaminating bacteria, spores and other microorganisms are carried in the airstream through an odor absorbing charcoal filter, then through an extended media prefilter. Final filtration is provided by a HEPA filter, 99.99% eff. @ .3 micron or larger which is tested according to accepted procedures as described by the Institute of Environmental Sciences (IEST) and/or ISO standards.

Variable Speed Control

Airflow is controlled by a solid state variable speed control with RFI suppression and ranges from 450-600 CFM. HEPA filtered air is exhausted out of the unit through a top mounted discharge grille or optional adapters are available for discharging air into a host building HVAC system.

Germicidal Lamp

Model No. 16503 is equipped with a Germicidal lamp to help kill bacteria in the airstream.

Tamperproof Controls

Units are powered by a 115 volt, 60 Hz, single phase motor and each unit features a solid state variable speed control with RFI suppression, a magnehelic gage for monitoring the filter condition, a pilot light and an eight (8) foot power cord. All the controls for the units are located under a clear tamperproof cover.

Easy to Move

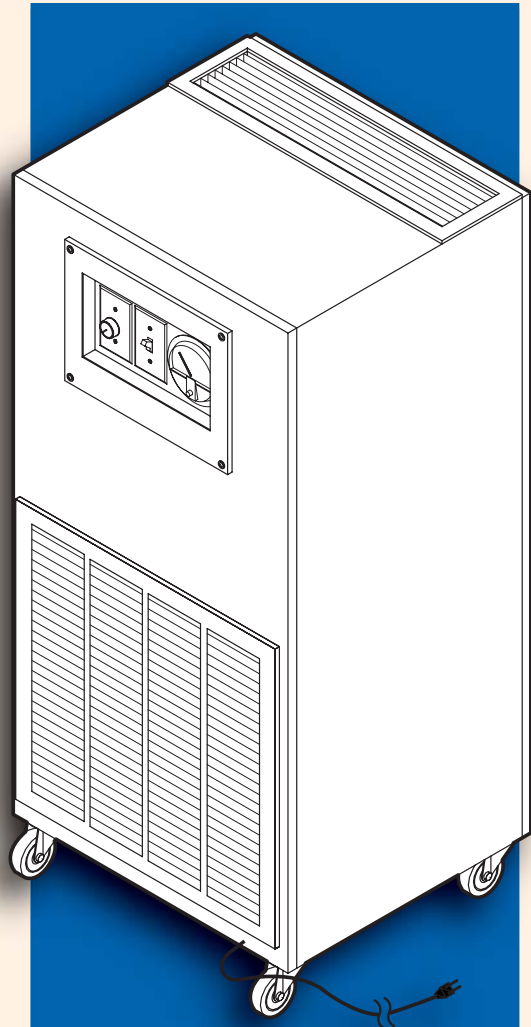

HEPA Air Purifiers are equipped with four casters resulting in an easy to move unit. When the unit is placed in its preferred location, casters can be locked to prevent movement.

Replaceable Filters

Prefilters are replaced by removing the front grille and the HEPA filter is replaced by removing the rear access panel.

Suitable for Hospitals or Healthcare Facilities

Housings have a durable white stippled powder coat finish and will blend into the décor of a hospital or healthcare facility.

Model 16500
Complete w/Top Grille and Casters

Model 16503
Complete w/Germicidal Lamp
Top Grille and Casters

Cleanmaster is a brand name owned by Clean Rooms International

Cleanmaster HEPA Air Purifier

Ordering Information	
Model No.	Description
16500	115V, 60Hz, Complete w/Casters & Top Grille
16503	115V, 60Hz, Complete w/Germicidal Light, Casters & Top Grille

Options	
Model No.	Description
503261	Rectangular Back Exhaust Adapter
503262	Back Exhaust Adapter with Duct Collar

Replacement Parts	
Mfg. Code	Description
302030	HEPA Filter
302190	Prefilter 20" x 20" x 1"
302193	Charcoal Prefilter 20" x 20" x 1"
503263	Top Exhaust Grille
503283	Front Intake Grille
703745	Replacement UV Light, G30 T8
703848	Replacement Ballast for UV Light
703890	On/Off Switch
703902	Eight (8) foot Power Cord
703910	Variable Speed Control
805083	Swivel Caster w/Brake, 3' x 1-7/8"
